EVERBLOOMING POLYANTHA OR BABY ROSES

The origin of the Polyantha is not clear. It is believed to have come from the Multiflora ramblers; hence the misleading names sometimes applied to them "Baby Ramblers." Price, except as noted, best-grade 2-yr. plants, \$1.10 each; 3 for \$2.85; \$10.50 per doz.

Hardy Climbers, Ramblers and Pillar Roses

A Climbing Rose is a plant that, if given support, grows higher and higher, starting each year from or near the top of the previous year's growth.

A Rambler, properly speaking, has long, thin, pliable branches which if not supported, take root where they touch the ground and thus "ramble."

A Pillar Rose does not climb or "ramble" for its canes are too stiff. Some are strong and self-supporting; others require a stake or some support.

Give this one two or three years to establish itself and then sit back and collect the compliments. Truly a "thing of beauty"! KATHARINA ZEIMET (White Baby Rambler). A small, double, fragrant, pure white polyantha blooming in perfect, hybrid-tea like, baby rose clusters of 25-50 on a short stem. The bush is dwarf and bushy. Made to order for mass plantings and ideal for cutting. \$1.25 each; 3 for \$3.15; 6 for \$6.
